SYSTEM

Industrial brushes
Ideal for HoReCa areas and food industry

Advantages

- **Suitable for contact with food substances:** bristles and support are in non-toxic material, it can come in contact with food
- **Efficient:** bristles are in non-hygroscopic material, it does not absorb moistness and aqueous substances
- **Autoclavable:** material resistant to temperatures up to 120 ° C
- **Resistant:** it stands out for their high resistance to chlorine and caustic cleaning solutions
- **Safe:** the blue colour of the bristles allows immediate detection in the event of accidental fragmentation
- **Long-lasting:** shock-resistant and for frequent use, it does not deform with use or when subjected to temperature variations
- **Highest hygiene:** the blue bristles make it easier to identify the presence of food residues, spores, mold and detergent
- **Efficient:** bristles are characterized by low friction, that grants high performances in terms of cleaning
- Complies with H.A.C.C.P.

Material

Structure: polypropylene - Bristles: PBT
